

InvertiGro®

enabling businesses to become
highly efficient and sustainable modern farmers
with
innovative and fully-integrated,
cost-effective and flexible
indoor vertical farming solutions

Co-Founder & CEO, Ben Lee

the global need

we need to feed the world a smarter way

Rising urban growth

Growing population

Diminishing resources

Increasing food miles & waste

SDG imperatives

indoor vertical farming has been identified as one of the most productive means to meet food security and sustainability challenges locally and globally.

Market CAGR of 22.6% 2022-2030 to \$24B by 2030

a smarter way to farm

Reliable supplies & consistent quality

Out of season or out of region crops

Less land

Less water

No chemical pesticides

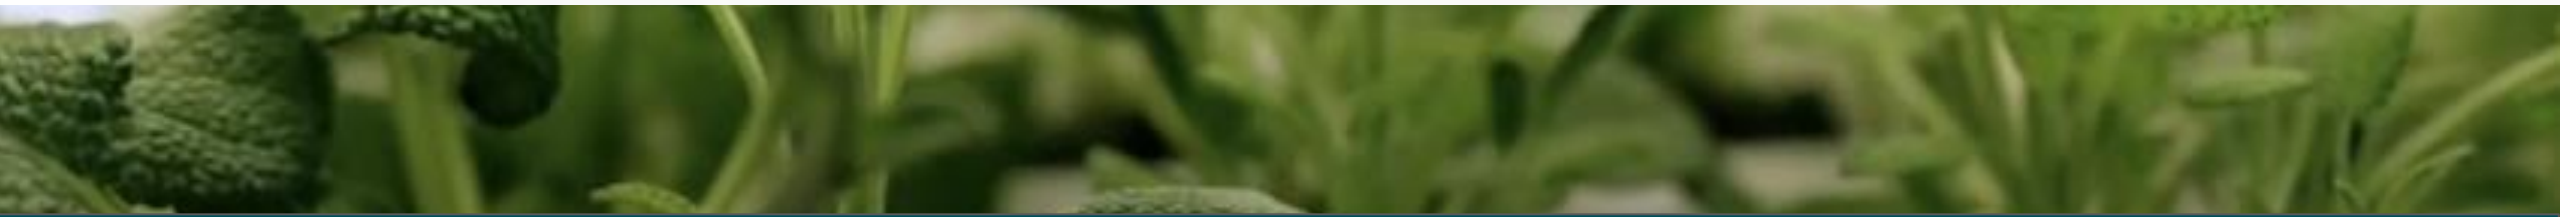

Greater Food Security

Fewer food miles

Less waste & packaging

Growing more with less, where and when it is needed

Problem

current indoor vertical farming alternatives are expensive, complex, inflexible and slow to generate returns.

Solution - what if the process looked more like this?

with an indoor vertical farming solution that is

Affordable

Flexible

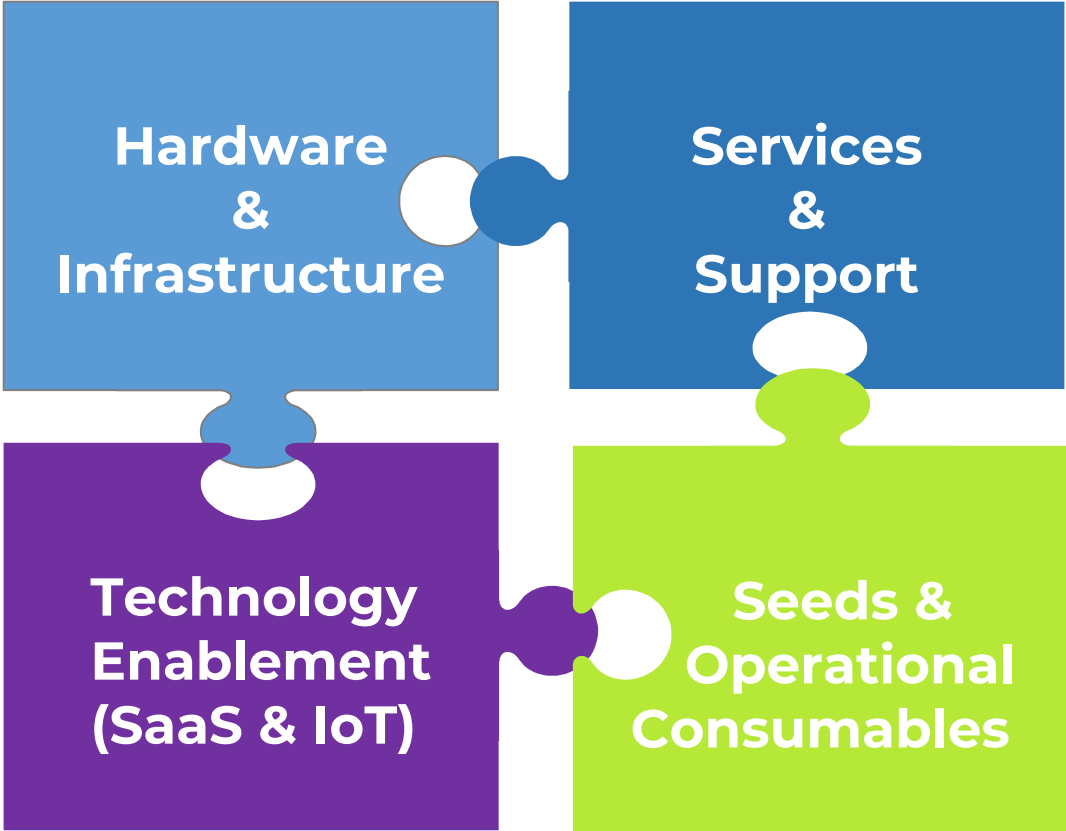

Scalable

Smart

a fully integrated solution

OEM and annuity-based revenues protected by technology-enabled 'moat'

InvertiGro's USPs address the industry's key challenges

Sealed InvertiCubes negate the need for costly building modifications

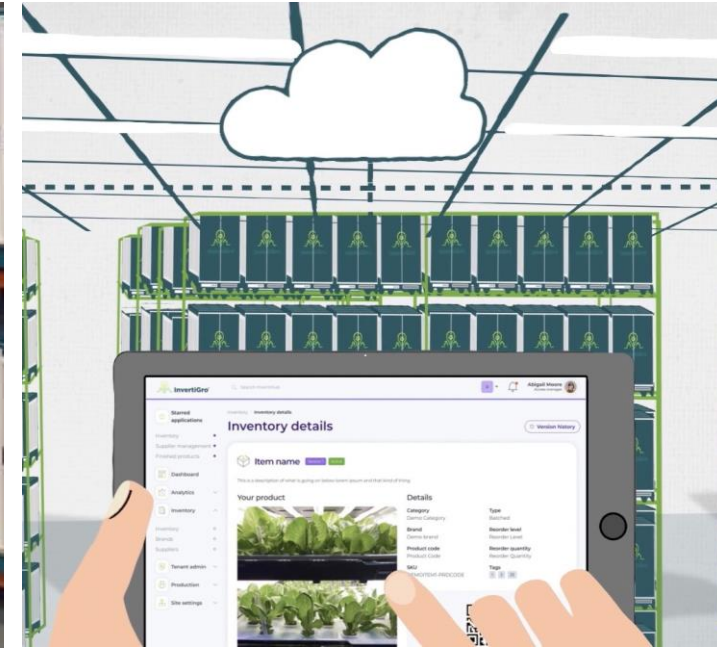

Reconfigurable interiors provide yield & resource efficiencies for a wide crop range

Compatibility with standard racking and materials handling enables efficient scalability

Fully integrated operating software with encoded grow recipes, avoids costly trial & error / on-staff expertise

Affordable

Flexible

Scalable

Smart

delivering unparalleled flexibility

our systems have the flexibility to efficiently grow the widest range of fresh produce of any CEA technology on the market...

Crop Range

Leafy Greens

Fruit & Veg

Flowers

Medicinal Plants

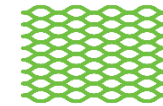

Microgreens

Proteins

Animal Feed

Natural Fibres

Customer Applications

Farmers

Distributors, Retailers & Wholesalers

Food Service & Hospitality

Pharmaceuticals & Wellness

Humanitarian, Military & Mining

Property Developers & corporates

...and can be applied anywhere along the value chain.

Revolutionising indoor vertical farming

**quicker and more affordable to set up and scale,
simpler, more sustainable and cost-effective to operate,
delivering higher yields, and greater crop flexibility
than in market alternatives**

InvertiGro is Indoor Vertical Farming that really stacks up
